Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	28 October 2026
Team ID	EN25CS3010020
Project Name	Global Olympic Sports Performance Analysis
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)	Priority (High/Medium/Low)
1	Data Access & Integration	Connect the four institutional CSV datasets: country rankings, athletes, games summary and medal results.	High
2	Data Processing	Configure data types, fields and relationships required for Olympic data analysis.	High
3	Business Analysis	Calculate and compare medal totals, medal types, yearly trends and athlete participation indicators.	High
4	Business Insights & Analytical Outputs	Provide 8 visualizations, 3 dashboards and a 4-point Tableau Story.	High
5	User Interaction & Analysis	Allow users to explore supported Year, Season and Sport filters and compare chart results.	High
6	Data Update & Reporting	Present analytical outputs through the Tableau workbook and publish the updated workbook when required.	Medium

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	Dashboards should have clear titles, readable labels, legends and intuitive filters.
NFR-2	**Security**	Use trusted institutional datasets and follow Tableau Public sharing settings; do not expose private information.
NFR-3	**Reliability**	Charts and filters should display consistent results without errors for supported data.
NFR-4	**Performance**	Dashboards should load and respond to filters smoothly for the supplied dataset size.
NFR-5	**Availability**	The published Tableau workbook should be accessible when the service is available and sharing permissions allow access.
NFR-6	**Scalability**	The workbook structure should allow additional

		Olympic datasets and visualizations to be incorporated in the future.
