Project Initialization and Planning Phase

Date	28 October 2026
Team ID	EN25CS3010020
Project Title	Global Olympic Sports Performance Analysis
Maximum Marks	3 Marks

Project Proposal (Proposed Solution) template

This project proposal outlines a solution to address a specific problem. With a clear objective, defined scope, and a concise problem statement, the proposed solution details the approach, key features, and resource requirements, including hardware, software, and personnel.

Project Overview	
Objective	To analyze Olympic sports performance using interactive visualizations of medal rankings, medal trends, athlete participation and regional indicators.
Scope	Connect four institutional CSV datasets and develop 8 visualizations, 3 dashboards and a 4-point Tableau Story.
Problem Statement	
Description	Olympic performance data is distributed across multiple datasets, making comparisons of countries, medal types and athlete-related patterns difficult to perform manually.
Impact	Manual comparisons take time and make it harder to identify patterns and communicate findings clearly.
Proposed Solution	
Approach	Use Tableau to connect the supplied CSV datasets, configure data relationships, create visualizations and dashboards, and explore patterns through supported filters.
Key Features	Country medal rankings, gold/silver/bronze comparison, year-wise medal trends, athlete gender and sport analysis, regional medal-efficiency indicators, host/investment-category analysis, interactive dashboards and a Tableau Story.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	NVIDIA GeForce RTX 3050 Laptop GPU (4 GB) Intel(R) Iris(R) Xe Graphics (128 MB)
Memory	RAM specifications	16 GB
Storage	Disk space for data, models, and logs	1 TB SSD
Software		
Frameworks	Python frameworks	Tableau Desktop / Tableau Public; Flask planned for future web integration
Libraries	Additional libraries	No additional Python libraries required for the current Tableau implementation
Development Environment	IDE, version control	Tableau Desktop/Public and web browser; VS Code for planned Flask development
Data		
Data	Source, size, format	Institution-provided CSV datasets: alltime_country_rankings.csv (60 rows), athletes.csv (8,000 rows), games_summary.csv (18 rows), medal_results.csv (910 rows). Total: 8,988 rows across four files.
